

3rd INTERNATIONAL LED FORUM MOSCOW LEDS in Lighting Technologies

Moscow, 11 - 12 November 2009
Expocentre Fairgrounds

Impressions 2008

The 2nd INTERNATIONAL LED FORUM “LEDs in Lighting Technologies” took place on December 10th 2008. More than 200 participants showed interest in the wide range of talks on LED topics. Renowned speakers introduced the forum to current projects and developments in the LED industry. As an US representative, Professor Fred E. Schubert gave a talk on ‘Light-Emitting Diodes - Looking Back 100 Years and Looking Forward to the Next 10 Years’ and received quite an ovation for his presentation. Yefim Rosenberg as the representative of the Russian Railways Corporation gave the forum participants exclusive insights into the plans of his company to invest in LED technology. Naturally, the interest in his talk was quite impressive.

Other presentations were given by LED experts of the Moscow State University, Mossvet (Municipal Unitary Enterprise), Rosnanotech, Svetlana-Optoelectronics, the Federal State Research Institute of Semiconductor Devices, CREE Europe GmbH, OSRAM Optoelectronics, Philips Lumileds and others. The LED FORUM ended with a round table discussion which gave the 200 visitors the opportunity to discuss problems of the introduction of LED technologies on the Russian market.

The overwhelming interest of LED experts from all over Russian and Eastern Europe proved that the LED FORUM MOSCOW has already in its second year become the most important LED conference for Russia and Eastern Europe. The LED FORUM 2009 will be extended to two days and will take place on November 11 - 12, 2009 at Expocentre Fairgrounds in Moscow.

Programme 2009

Date: November 11 - 12th 2009

Place: Moscow, Expocentre Fairgrounds

Programme: **November 11th 2009:**
Plenary Session - LED technologies: A new quality of lighting

November 12th 2009:
Workshop Sessions - technologies and new application fields
Workshop A: Shop lighting/ LEDs
Workshop B: Outdoor and indoor lightings/ street lighting / LEDs
Workshop C: Lighting control systems/ LEDs

Speakers: Invited are LED experts from leading international and Russian companies, such as OSRAM Optoelectronics, Philips Lumileds, Cree, Svetlana Optoelectronica, Rosnanotech, Mossvet, Russian research institutes and further LED companies. The LED forum was simultaneously translated from Russian into English.
